BODY COMPOSITION ANALYZER MACHINE

INTRO

The InBody 380 is a body composition analyzer that provides accurate measurements of key health metrics, including body fat percentage, muscle mass, visceral fat, and total body water. Using bioelectrical impedance analysis (BIA) technology, it offers precise, easy-to-read results, helping individuals track their fitness progress and make informed decisions about diet and exercise. Commonly used in fitness centers and health clinics, the InBody 380 is a valuable tool for monitoring overall well-being and achieving fitness goals.

FEATURES

Precise Body Composition Analysis

Measures key metrics such as body fat percentage, muscle mass, visceral fat, and total body water with high accuracy.

Segmental Analysis

Offers detailed insights into body composition for individual segments (arms, legs, torso), helping track fat and muscle distribution.

User-Friendly Interface

Features a clear, easy-to-navigate touch screen that displays results in an understandable format for users at all fitness levels.

Basal Metabolic Rate (BMR) Measurement

Estimates daily calorie needs based on metabolism, helping users tailor their diet and exercise plans more effectively.

Quick and Convenient Testing

Delivers fast, reliable results in just a few minutes, making it ideal for use in gyms, clinics, and wellness centers.

ENHANCED USER EXPERIENCE

QUICK MEASUREMENT

Experience quick and precise body composition assessment within just 30 seconds, available for immediate consultation.

CONVENIENT MEASUREMENT

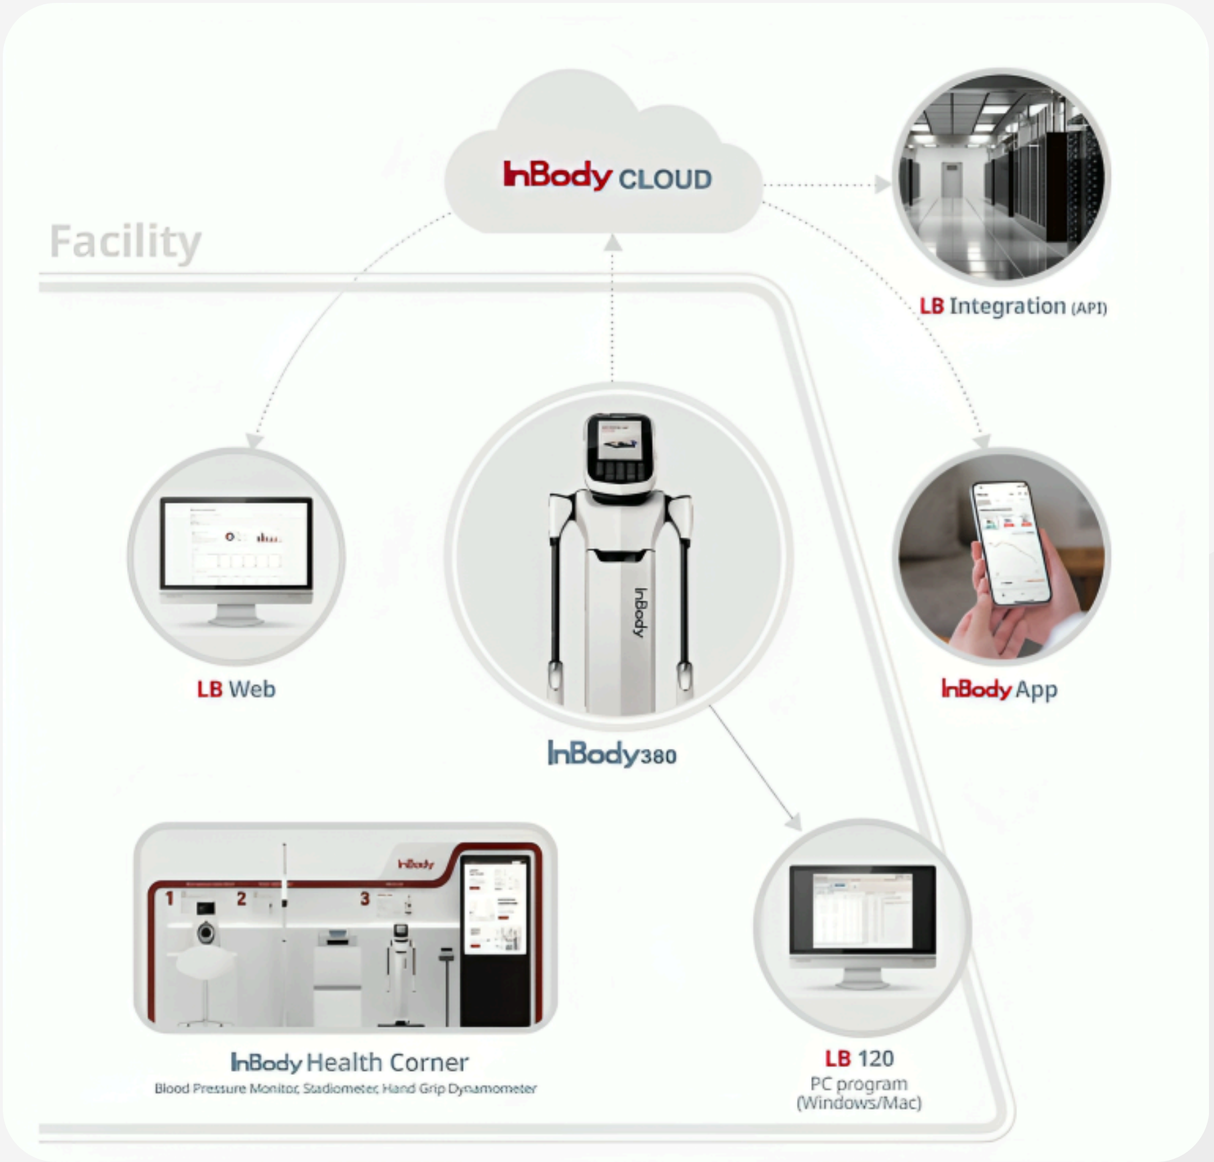

Obtain accurate measurements by holding anywhere on the ergonomically designed 3-way hand electrode.

SMART RECOGNITION

Obtain accurate measurements by holding anywhere on the ergonomically designed 3-way hand electrode.

DATA INTEGRATION SOLUTION

InBody Data Comprehension

Provide a health report to monitor your customers body composition goal.

Access InBody Results

Through PC, tablet and smartphones, access your customer's InBody results.

Analytical Dashboard and Reports

Get an intuitive analysis of your InBody data on the dashboard.

API Integration

Upon customer consent, utilize InBody data through API and SDK.

BENEFITS

ACCURATE HEALTH MONITORING

Provides precise data on body fat, muscle mass, and hydration levels, helping users monitor and track their health and fitness progress.

PERSONALIZED FITNESS AND NUTRITION PLANS

With detailed metrics like Basal Metabolic Rate (BMR), users can tailor their diet and exercise routines to achieve their specific goals.

TARGETED BODY COMPOSITION INSIGHTS

Segmental analysis allows for a deeper understanding of muscle and fat distribution across different body areas, aiding in targeted fitness planning.

TIME-SAVING AND CONVENIENT

Delivers quick, reliable results in minutes, making it easy to track progress without the need for complex or lengthy assessments.
