LIST OF HANDLES

LipoMax Pro Light- Body

Cryo Max Sculpt Pads with cooling pads is an advanced device for non-invasive fat reduction, skin tightening, and body sculpting. It combines cutting-edge technology to deliver effective and comfortable treatments.

LipoMax Pro Light- Limps

The Laser is an advanced, non-invasive body contouring and fat reduction device designed for professional use. It employs cutting-edge 10D laser technology to target stubborn fat deposits, offering effective and safe body sculpting solutions.

KEY FEATURES

Non-Invasive Fat Reduction

Utilizes LED light therapy to target and break down fat cells without surgery, providing a safe alternative to traditional methods.

Targeted Treatment

Adjustable settings ensure precise fat reduction for various body areas, enhancing treatment effectiveness.

Skin Tightening Benefits

Promotes collagen production, improving skin elasticity and overall texture.

User-Friendly Interface

Features an intuitive design that simplifies operation for both professionals and clients.

KEY FEATURES

Painless and Safe

Offers a gentle treatment experience with no discomfort or downtime, making it suitable for all skin types.

Customizable Sessions

Multiple wavelength options allow tailored treatments to meet individual client needs.

Time-Efficient

Delivers quick sessions, perfect for clients with busy lifestyles seeking convenient results.

Durable Design

Built with high-quality materials to withstand frequent use in professional environments.

BENEFITS

EFFECTIVE FAT REDUCTION

Targets stubborn fat deposits for visible contouring results without surgery.

IMPROVES SKIN ELASTICITY

Stimulates collagen production, leaving skin firmer and smoother.

NON-INVASIVE AND PAINLESS

Offers a safe, comfortable alternative to traditional fat reduction methods.

QUICK AND CONVENIENT

Provides fast treatment sessions with no downtime, ideal for busy schedules.
