

808NM DIODE LASER + Q SWITCH LASER MACHINE MADE IN KOREA

808NM DIODE LASER

INTRO

The 808nm diode laser is a safe and effective technology for hair removal, targeting hair follicles with precision to achieve long-lasting results with minimal discomfort.

Precision Targeting

Targets hair follicles with the 808nm wavelength for effective hair removal.

Versatile for Skin Types

Suitable for a wide range of skin tones with minimal risk.

Comfort and Speed

Provides fast treatments with cooling systems to enhance comfort.

LIST OF HANDLES

808NM DIODE LASER HANDLE

The diode laser handle features an integrated display for real-time control and monitoring of functions.

FEATURES:

Effective Hair Removal

The 808nm wavelength targets melanin in hair follicles, offering efficient and long-lasting hair reduction.

Deep Skin Penetration

It penetrates deeper into the skin compared to other laser types, ensuring effective treatment for various hair types.

Suitable for All Skin Types

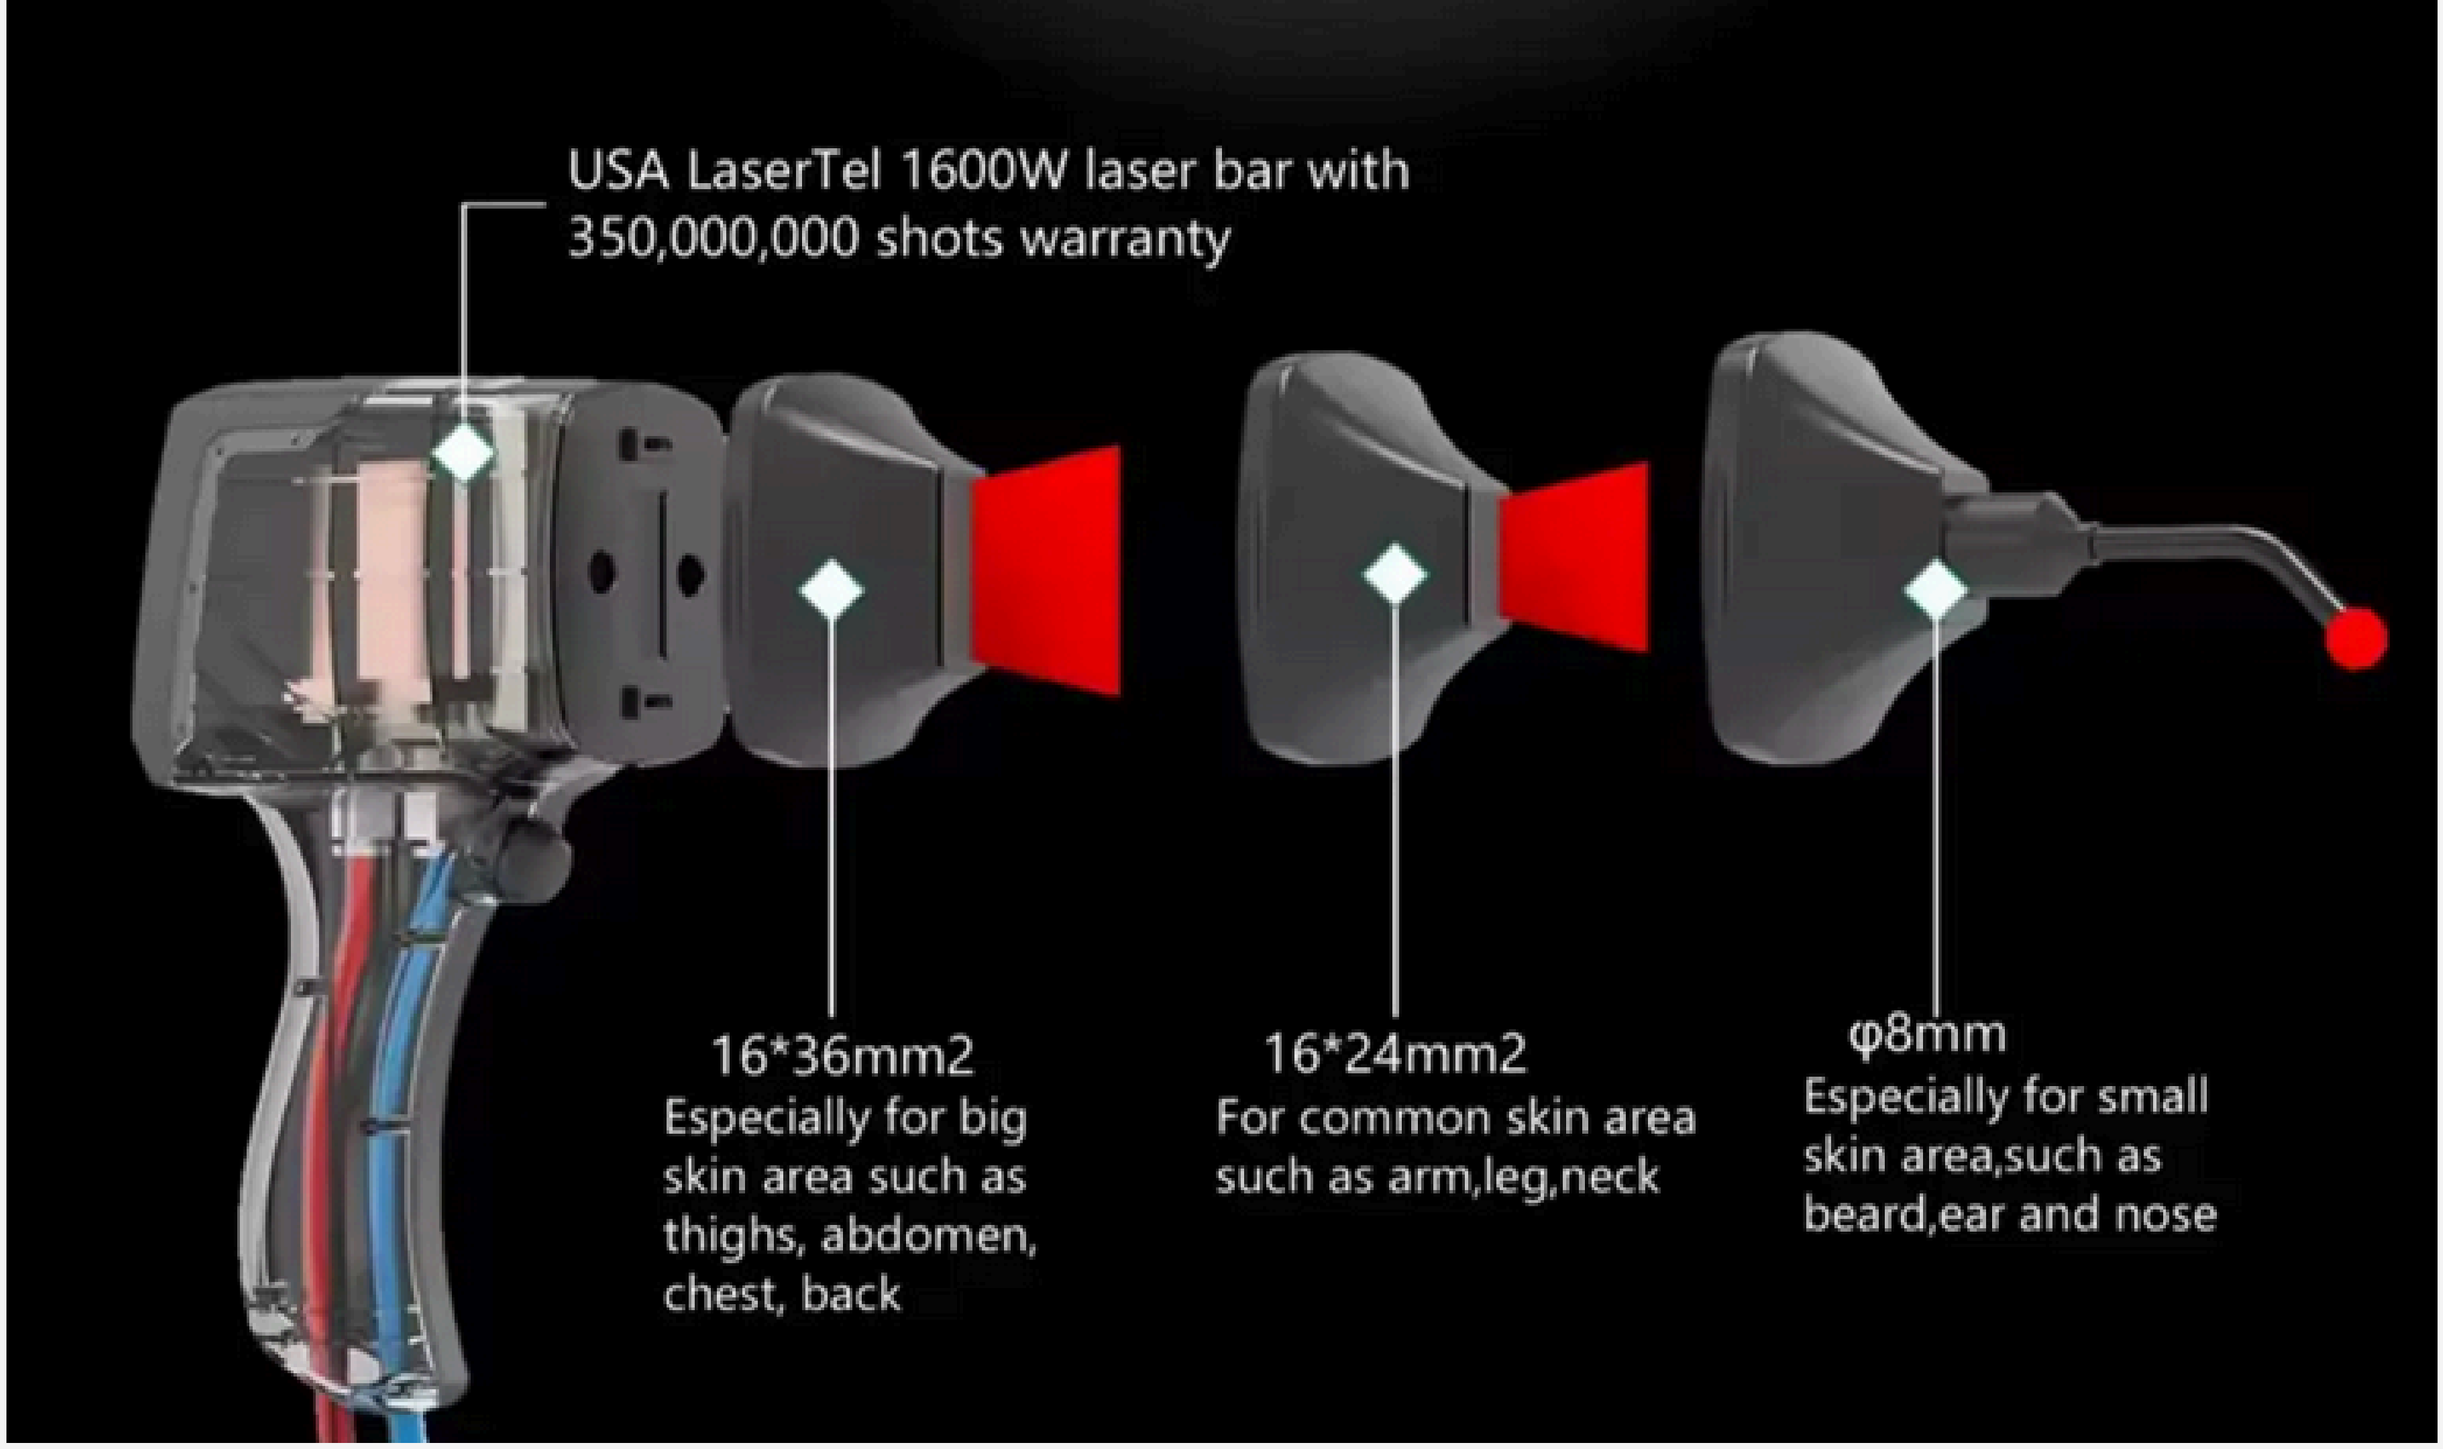

Safe and effective for a wide range of skin tones, including darker skin, with minimal risk of side effects.

Minimal Discomfort

The integrated cooling system reduces pain and enhances comfort during treatment.

Fast Treatment Time

Provides quick treatment sessions, making it ideal for both small and large treatment areas.

USA LaserTel 1600W laser bar with
350,000,000 shots warranty
16*36mm2
Especially for big skin area such as thighs, abdomen, chest, back
16*24mm2
For common skin area such as arm,leg,neck
φ8mm
Especially for small skin area,such as beard,ear and nose

Q SWITCH ND - YAG LASER

INTRO

Q-Switch Nd:YAG laser machine is a non-invasive device used for skin rejuvenation, pigmentation treatment, and tattoo removal. It delivers high-intensity laser pulses to break down melanin or ink particles without damaging surrounding tissues.

High Precision

Targets pigmentation and tattoos with minimal tissue damage.

Dual Wavelengths

Effectively treats deep and superficial skin concerns.

Versatile Applications

Suitable for skin rejuvenation, pigmentation removal, and acne scar reduction.

LIST OF HANDLES

Q SWITCH NDYAG LASER HANDLE

The handle delivers high-intensity pulses for precise skin rejuvenation and tattoo removal. Its dual wavelengths target deep and superficial layers effectively, ensuring versatile treatment options.

FEATURES:

Pigmentation Treatment

Effectively targets melasma, age spots, and freckles.

Tattoo Removal

Safely removes multi-colored tattoos.

Skin Rejuvenation

Enhances skin texture and reduces fine lines.

Minimal Downtime

Offers quick recovery with minimal side effects.

Precision

Delivers targeted treatment without damaging surrounding tissue.

LIST OF HANDLES

1064nm Tip

Targets deep black pigmentation, tattoos, and vascular lesions with minimal damage.

532nm Tip

Targets colored pigmentation and vascular lesions with precision.

755nm Tip

Targets deeper pigmentation, age spots, and skin rejuvenation.

1024nm Tip

Targets deep pigments, tattoos, with minimal skin damage.
